

Accounting Integrations for Younium

**We make your
systems communicate
with each other.**

Simple.

Why integrations?

A seamless daily experience

- Automatically transfer invoices from your system to your accounting software
- Pull customer orders from your accounting system and send them directly to recipients
- Integrate with banks to seamlessly transfer payment files back into your system, enabling real-time payment status updates on invoices.
- Forward unpaid invoices to debt collection services with ease
- Distribute invoices efficiently through EHF, eFaktura, and PEPPOL formats

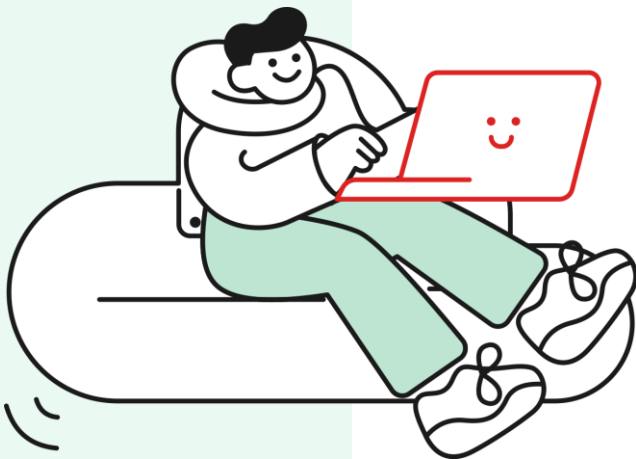

Disconnect, while we connect you

Our experienced team stays constantly up to date with the latest industry developments

Trusted by customers for delivering efficient and reliable solutions to their challenges

Reduce input errors and incorrect entries through smart system integrations

Save time by eliminating manual, repetitive tasks with automated workflows

How to get started with your integration?

Developing a new integration with Younium typically costs between 40,000 and 80,000 SEK, depending on the complexity and required functionality.

However, we offer prebuilt integrations with over 250+ systems, with an estimated setup fee ranging from 7,000 to 15,000 SEK, and an annual cost of approximately 10,000 SEK.

👉 Explore our prebuilt integrations [here](#).

📞 Contact Michael for a tailored quote based on your specific integration needs.
